RFC Status Changes

This page lists the RFCs whose statuses have changed since publication.

The process for how documents' statuses are updated has changed over time. The information below is based on:

- Document or Protocol Actions requesting a status change
- RFCs that requested the status change
- Private communication between the RFC Editor team and/or third parties (earlier years)*
- Defined RFC Editor process*

Links to the Document or Protocol Action or the RFC are provided where possible.

***Note:** At one time, the RFC Editor had the ability to move documents to Historic or Informational as the party responsible for the RFC Editor Index. The RFC Editor received and sought input regarding status changes and updates were made as needed. "Official Internet Protocol" documents and "IANA Assigned Numbers" documents were moved to Historic when the obsoleting documents were released as part of the publication process.
